25+ Countries

30+ Partnerships

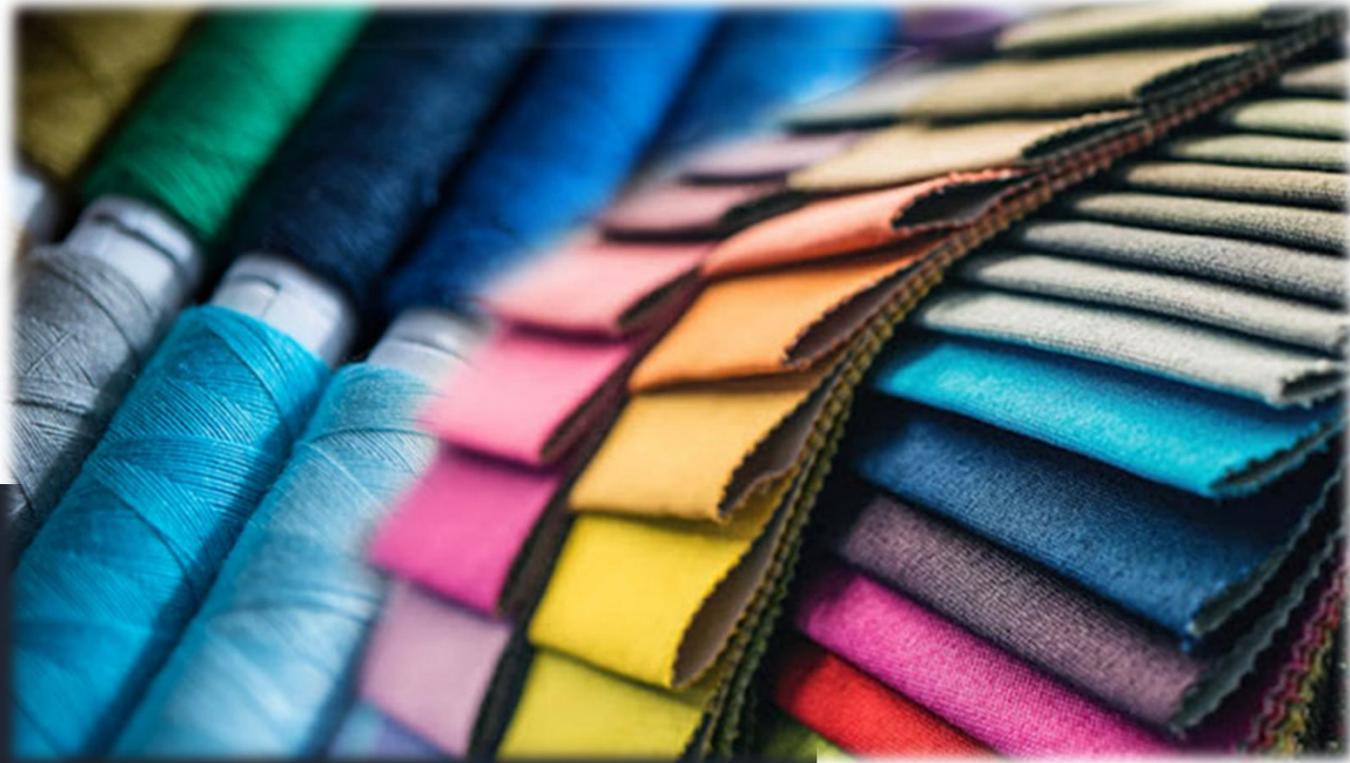

- GRACE is a multi-disciplinary business consulting company with global presence, providing “Everything Under One Roof” services..
- GRACE leads the way in empowering textile companies by fostering innovative, efficient, and high-performance manufacturing environments through our specialized textile engineering consulting services.
- We excel in optimizing textile production processes, enhancing quality control, and implementing sustainable textile technologies, ensuring superior operational efficiency across diverse textile sectors.
- Driven by a passion for cutting-edge solutions and industry expertise, GRACE is committed to advancing textile innovation and delivering exceptional value to clients across the global textile industry.

Introduction

Our textile manufacturing machinery audits ensure peak performance by evaluating equipment efficiency, safety, and maintenance. This process identifies areas for improvement, reduces downtime, enhances product quality, and minimizes costs, ensuring compliance with industry standards and reinforcing your reputation for reliability and excellence.

VISION & MISSION

Vision

To be a leader in delivering innovative, efficient, and customer-focused textile manufacturing solutions, driving industry standards for quality and operational excellence.

Mission

To optimize textile manufacturing through comprehensive machinery audits, ensuring peak performance, safety, and quality, while helping our clients achieve sustainable growth and a competitive edge.

Machinery Audit

Technical Evaluation: Comprehensive evaluation of textile machines.

Failure Detection: Identifying potential sources of failure to prevent downtime.

Performance Gap Analysis: Assessing and improving system reliability and efficiency.

Equipment Assessment: Accurate inventory and condition verification of tools and equipment.

Used Machinery Sales & Purchase

Global Reach: Facilitating sales from Europe to Asia and within Asia/Africa.

On-Site Audits: Engineers conduct audits to determine true machine value.

Dismantling & Re-erection: Professional dismantling and re-erection services by experts.

Project Report & Consulting

Feasibility Reports: Practical techno-commercial reports for new ventures.

Machinery Selection: Expert advice on selecting the right machinery to balance capacities and meet production needs.

Accessory Recommendations: Suggesting appropriate accessories to match the product portfolio.

Machinery Reconditioning

Complete Restoration: Resetting misalignments and inaccuracies in machinery.

Function Upgrades: Installing new electronic controls on older machines.

Cost-Effective Repairs: Finding quality replacements for spare parts.

Performance Enhancement: Reducing vibrations, noise, and electricity consumption to extend machine life.

Product Analysis & Fault Troubleshooting

Yarns & Fabrics: Analyzing blends, weave, and fiber types.

Fault Analysis: Identifying root causes of product faults and implementing remedial actions.

Remedial Confirmation: Ensuring the effectiveness of corrective measures.

Sourcing & Supply Chain Solutions

Consistent Sourcing: Ensuring a reliable supply of goods and services.

Cost Mitigation: Reducing costs for both suppliers and buyers.

Risk Reduction: Minimizing risks associated with sourcing and supply chain disruptions.

Outsourcing & Joint Ventures

Outsourcing: Explore opportunities to outsource non-core activities.

Joint Ventures: Partner with industry leaders to enhance business growth and innovation.

Why US?

Team

Big spectrum of professionals who have been 'hands on' in their areas of expertise. Professionals who have the requisite qualifications, capability and knowledge of the system, rules and regulations.

Business Ethics

High credibility, reliability and transparency in our services.

Reach

Seamless functionality amongst related departments.

Scalability

Capacity to scale up the initial scope of engagement.

Single Window Consultancy Solutions

Multi-segment Multi-domain Consultancy.

Value for Money

Quality and timely output at competitive prices.

Experience, Excellence, and Endurance
